Eurydice, a unique source on Education in Europe

Education systems vary enormously across Europe. Understanding how they are organised and how they work is essential for promoting cooperation and mobility at European and International levels.

A long-established European network, EURYDICE, aims to meet this need by providing an accurate picture of the European Education landscape, covering all levels of education. This includes:

- **EUPYEDIC, the European Encyclopedia on National Education Systems**: readily comparable and up-to-date descriptions of the organisation of 38 European systems;
- **Comparative Studies** on issues on the agenda of European cooperation in education;
- **A Series of Key Data** offering indicators on various key topics such as the use of new technology at school or learning languages; and
- **Facts and Figures** on the structure and the main features of education systems such as school and academic calendars, taught time in compulsory education, teacher and school heads salaries.

**What Eurydice does**

The Eurydice network aims to facilitate European cooperation in the field of education. Its main mission is to provide those responsible for education policies at European, national and local level with analyses and information which will assist them in their decision making.

Eurydice collects information on national laws, regulations and policies as well as relevant statistics. Results from research and major international surveys complete the analysis when appropriate. This makes it possible to identify common patterns and trends and provides a basis for reflection on effective strategies in education. Eurydice supports work in the context of the Europe 2020 strategy and contributes to the reporting on the Bologna process in Higher Education.

Eurydice was established jointly by the European Commission and the Member States in 1980 to exchange information on Education national systems. It is funded by the EU Action Programme in the field of Lifelong Learning and consists of:

- **a European Unit** which coordinates the Network and produces its publications. The unit is based in the EU Education, Audiovisual and Culture Executive Agency in Brussels.
- **37 National Units based in all 33 Countries** participating in the EU’s Lifelong Learning programme. These gather national information and contribute to analysis. National Units are mostly situated in Ministries of Education, with some in national agencies, research centres or other organisations. They work closely with leading experts in the field.

Eurydice collaborates with Eurostat, Cedefop, the European Training Foundation, the European Agency for Development in Special Needs Education and CRELL (the Centre for Research on Lifelong Learning). Eurydice also supports the European Commission’s work with international organisations such as OECD, the Council of Europe and Unesco.
