Project objective:

The objective of the project is to enhance the understanding (linguistically, culturally, socially and educationally) and the international cooperation capacity in the field of science, education and culture between Europe, Jordan and Syria through an institution-based mobility scheme (all five levels included) between 10 universities in Europe, 5 universities in Jordan and 5 universities in Syria.

In order to create relations and bridges between Europe and the targeted countries special attention will be paid to fields of common interest to the partners but all fields will be included to promote social, economical, and political stability that could bridge some of the gaps that may threaten to grow between Europe and the targeted countries.

Brief description:

Lund University is dedicated to the development of cooperation with universities in the Middle East, and previous fruitful experiences of long-term cooperation with the European universities and with several universities in the targeted countries. All partners have embraced the idea of a systemic and institution-based approach to mobility at all levels as a mean of achieving improved understanding and compatibility between higher education systems and to further deepen and develop an already on-going cooperation.

Throughout the first four years of the Erasmus Mundus program with Jordan and Syria (and Lebanon), a partnership coordinated by Lund has jointly implemented a mobility scheme that promotes the establishment of more systematic, transparent and effective approach for collaboration in education and research. Now that the start-up hurdles of the programme have been overcome, we believe our experience and knowledge from the previous project will be successfully transferred to all eight new partners as well. Our vision with the Jordan/Syria lot is to let it reach its full potential and not merely a work as a scholarship programme, but full-scale network cooperation at all levels reaching beyond the scholarships offered. Our intentions is to further strengthen our relations and developing new areas of cooperation in matching research as well as continuous actions for transparency and comparability between the different higher education systems under EM Action 2.

Twelve active partners (Lund included) that have been part of the on-going projects with Jordan/Syria/Lebanon will also be partners in this new project for Jordan and Syria securing continuity in the project while the new partners will bring new ideas, values and competences. Continued cooperation with the same partner universities in Jordan and Syria secures sustainability in the project, while the new partners in Jordan and Syria will bring new ideas

and insights and already very good achievements will be shared. Partner universities will work closely with TG 2 universities to bring them closer the idea of the programme and to further involve them in the “Bologna process” by inviting them to conferences and seminars and do promotion visits.

All partners have a very high operational and academic capacity and commitment to the project and its objectives. The close cooperation with the Centre for Middle Eastern Studies at Lund University will secure the good relations in the lot countries for a sustainable development in a national and international environment for all partners involved.
