<p>Project objective:</p> <p>The overall objective of Erasmus Mundus Europe Asia, EMEA, (Lot 9) is to create a partnership in research and education that will strengthen the ties between Europe and Asia. The project will be used as a platform to establish or strengthen structures of academic cooperation, and emphasis will also be placed on capacity building aspects, specifically, the ability of the partner institutions to handle international mobility and large international cooperation projects. All partnership institutions will be enriched by the intercultural encounters made possible by the project, both during and after individual mobility periods. The goal of the project is to create cooperation structures of long-lasting value to the individuals and institutions involved. The partnership is committed to focusing on the visibility of the project in order to ensure that the aims of the project are fulfilled and that knowledge of the project is spread not only within the partner universities, but to other groups in the participating countries as well. The prioritized fields of study and research have been chosen in the accordance with needs identified in the Regional Programming for Asia Strategy Document 2007-2013: Environmental Issues, Public Health, Social Welfare, and International Law.</p>		
<p>Brief description:</p> <p>The Consortium is composed of partners representing nine European countries (Sweden, Belgium, Italy, Poland, UK, Ireland, France, Austria, and The Netherlands) and seven Asian countries (Thailand, Malaysia, China, Pakistan, Nepal, and Bangladesh). All the partners are outstanding universities in their respective countries and most are comprehensive and research-oriented. With such a wide spread of universities from different countries, the experience of international cooperation projects differ and one of the strongest benefits and opportunities is the possibility to develop a common good practice and know how within the project. We believe that by cooperating with the very best partner universities possible, the project will have a stronger societal impact in the Third Countries concerned: individuals chosen for mobility will return home better equipped to help shape their home region's future. In the process, strong links to Europe will have been established, helping both Asia and Europe better understand and cooperate with one another. Joint projects, such as joint programmes and joint research projects will be particularly emphasized within the project, both through the selection process and by organizing workshops on that theme.</p> <p>Central to the project are the mobility opportunities offered to 124 individuals, shared between undergraduate students, master students, PhD students, Post docs and staff. Equally important is establishing or strengthening links between partner universities and overall capacity building at partner institutions, in order to build a sustainable project. Special efforts will be made to attract individuals from vulnerable groups to the programme, such as victims of natural disasters, ethnic minorities, or more generally students and staff from exceptionally poor economic or socially vulnerable backgrounds. The five associate partners, together with the Asian partner universities, will play a key role in reaching out to these groups.</p>
