	<p>Brief description: EUPHRATES Project emerges as a proposal with a wide geographical scope, covering 9 states of Europe and 11 institutions from different parts of the Indian Country. This consortium will join efforts in order to enhance cooperation for fostering excellence in training and research, promoting exchange of students and researchers between India and the EU. The Universidade de Santiago de Compostela will coordinate this proposal supported by the joint-coordinating Institution Dr. Babasahed Ambedkar Marathwada. In the European Continent we find some Institutions with wide experience in remarkable projects, however, Indian Institutions, especially those from the so-called backward regions, have not still achieved this goal. In this context, the EUPHRATES project is expectetd to be significant, especially for those Institutions in a long-term run. Working under this project will bring them to a collaboration with other Institutions giving them the possibility to create boundaries among different Institutions and the opportunity to submit projects in the future.</p>
