	<p>Brief description:</p> <p>The key objective of the EuroInkaNet consortium is to enhance capacity for international cooperation between universities in Latin America's least developed countries and HEI in EU countries, by facilitating transfer of knowledge and best practice in training the next generation of researchers and academic staff. The consortium comprises 20 HEIs 7 from the EU and 13 from LA. On the European side, the applicant, MMU, and six other EU partners, from Spain (2), Sweden, Portugal, Finland and Hungary have accumulated a rich track record of experience of working in similar successful projects. From the 13 HEIs from Latin America, 7 are from the least developed countries in South America: Peru (3), Bolivia (2); Ecuador and Paraguay, and six from Argentina (2), Colombia, Brazil(2) and Mexico. Eight of the LA universities are situated in vulnerable areas in each of these countries, into which the project mobility of UG, PG students and training staff intends to make a big impact in the areas of Business Studies, Management, Science; Mathematics Informatics, Education, Teacher Training, Engineering, and Technology. It is expected that 182 UG, PG, PhD, post-doc and academic staff from LA countries (133) and EU (49) will benefit from physical mobility through the EuroInkaNet project. It is also expected that over 800 people from these and other countries of Latin America and EU countries will benefit through physical and virtual (Virtual Learning Centre (VLC) based eSeminars, eWorkshops, eMeetings and eConference) meetings and thematic workshops generated by the consortium related activities. Engaging to build a lasting network is EuroInkaNet motto. We will encourage joint-collaboration and international conferences joint-submissions of teams of LA/EU researchers which will make the dialogue between LA and EU researchers durable and sustainable.</p>
