	<p>Brief description:</p> <p>Lotus+ aims to link Asia and Europe together through cooperation between universities, and thereby create synergies. In order to achieve this, Lotus+ will continue to:- Enable students to study/research abroad and thereby establish a pool of well-educated, open-minded future leaders with international experience. When young people from European and Asian countries are brought together by offering opportunities to study abroad in the framework of a two-way mobility (from Asia to Europe and vice versa), it will give them a chance to establish long-term relationships through their study/research experience in the relevant host country. - Make it possible for gifted students from vulnerable groups to study abroad and thereby disseminating EU social and democratic values.- Work beyond Erasmus Mundus by creating Alumni tools, signing bilateral agreements, creating joint programmes among the partner institutions, but also to enhance the skills of staff, who can in their turn contribute to the improvement of the education system in their home country. In this way the work of the Lotus project will continue after 2018.- Disseminate Best Practices in creating a joint policy on recognition of studies abroad and credit transfer (here Europe will continue to serve as a role model with it´s Bologna process). This will also promote the regional cooperation in the Asian countries involved by encouraging the strong and experienced partners to guide and share their knowledge with the less experienced partner institutions in the project through the Regional Working Group, meetings and workshops on specific topics (ECTS, Bologna process).- Enhance in the medium term the political, cultural, educational and economic links between the EU and the Asian countries involved by continuing to include less experienced countries in Asia (eg Cambodia, Myanmar, Vietnam and North Korea) and not only the strong ones (China, Thailand, Indonesia).</p>
