	<p>Brief description:</p> <p>The mission of EM A2 SIGMA Agile is to address the real and changing needs of the Western Balkan Higher Education Institutions and to contribute towards innovative education, human resources professional development, employability, institutional and academic infrastructure building. These aims will be achieved not only through exposing students, researchers, academic and administrative staff to studies, research and training in other European countries, but also through accompanying initiatives, such as workshops, webinars or conferences. As the title of the project promises, the focus will be on the development of critical skills necessary for functioning in the knowledge-based society and increasing chances for success on the labour market. One of the characteristics of SIGMA Agile will be inclusion of students and alumni in the project activities, such as a conference organized by the scholarship holders themselves. Following Agile manifesto, the partnership will be enhancing effective interactions among the partners, scholarship holders, alumni, policy makers, local authorities, other Erasmuss Mundus partnerships, NGO's, and other stakeholders. It will be using effective project management tools and techniques and quality measures. It will be actively responding to the dynamics of the region. EM A2 SIGMA Agile will be built upon the tangible achievements of the ongoing project, but will add substantial value to it and surge up to capitalize the multiplier effects together with other partnerships and other organizations. By supporting talents and developing hard, transferable skills for employment, SIGMA Agile will fight brain-drain. It will further facilitate social inclusion (for example, students of Roma origin or IDP), cross-cultural understanding, and human capital building in the region. In a wider perspective, SIGMA Agile will positively affect innovation, employability, sustainable growth, stability, and peace in the Western Balkans.</p>
