Projects with countries of Latin America

2000-2002
INTRODUCTION

The key aim of setting out past projects in this compendium is to inspire others to create new, future projects. By giving concrete, detailed information about previous projects it is possible to demonstrate clearly what kind of activities can be carried out in the framework of the YOUTH programme, although the list is by no means exhaustive. The compendium offers an opportunity to discover ideas and stimulate the imagination.

The projects presented in this Compendium were selected for funding under the YOUTH programme at European level selection rounds within the so-called third-country cooperation with the countries of Latin America (LA) for budget years 2000-2002.

Third-Country Cooperation with the LA countries, initially launched in 1992, is still one of the priorities of the YOUTH programme in 2002 aiming to further develop and increase the number of these activities to comprise more diverse partnerships and to improve the quality of projects.

The objective of youth activities with countries outside the European Union is to promote a better understanding of the young people’s respective environments and to foster a sense of solidarity among them. These activities enable those involved to try out different forms of democratic participation in society. By contributing to the development of the youth sector in the partner countries, the YOUTH programme facilitates the acquisition of knowledge and techniques required for the active participation of young people into civil society.

This Compendium presents the projects selected with the Latin American countries and covers various types of activities under Actions 1, 2 and 5 of the Programme.

So what are Actions 1, 2 and 5?

Action 1 - Youth Exchanges bring together groups of young people aged between 15 and 25 from different backgrounds and from several countries, providing them with an opportunity to meet, and tackle issues under various themes. This leads to a better understanding of the diversity of culture, and to an appreciation of the value of that diversity. Group exchanges aim to combat prejudices and stereotypes, to promote active citizenship and to raise positive awareness of other cultures among the young participants and in local host communities.

Action 2 - European Voluntary Service enables a young person to become a volunteer in another country for a specific period, usually 6-12 months. This provides an informal intercultural learning experience for the young people involved, encouraging their integration into society and active participation, whilst also increasing their employability and giving them an opportunity to show solidarity with other people. Voluntary service projects support the development of local communities, foster the creation of new partnerships and promote the exchange of experience and good practice. These projects are a result of partnerships between sending organisations, host organisations and the volunteers themselves. They do not involve job-substitution and they are non-profit-making and unpaid.

Action 5 - Support Measures are designed to promote the aims of the YOUTH programme in a number of ways. They assist the development of the other Actions of the YOUTH programme by increasing the quantity and quality of projects submitted. Alternatively they may contribute to achieving the overall objectives of the Programme and to strengthening European youth policy or they may contribute to the development of the youth sector in the partner countries.

Action 5 activities are carried out in the fields of co-operation and partnerships, training measures and youth information. Cooperation and partnership activities help to establish permanent working relations between partners, or to promote innovation that favours new multilateral youth exchanges and voluntary service. Training activities provide youth workers or youth leaders and other support persons with the necessary skills to organise and manage transnational youth activities based on intercultural learning, or provide them with knowledge and competencies to work with young people with special needs. Youth information projects encourage greater cooperation and the development of new activities or materials to complement activities carried out in the field of non-formal education.

Find out more about all these projects in the following pages, where they are listed by Action.

This document is designed not only to give information on the accepted projects, but to be used as partner search resource as well.

AKBV (labour culture and education association) is a small national umbrella for NGOs co-operating with a number of migrant organisations in Germany. The organisation runs a cultural centre in the city of Ingolstadt offering language courses, children and youth work, computer courses for women, political education, courses and counselling for young unemployed people. They arrange international exchanges with unemployed young people, addressing matters of racism or peace and training of youth leaders and instructors.

This multinational exchange with 36 participants and 4 leaders from DE, ES, VE and EC will take place in Tucacas, Venezuela. Participants from DE are unemployed young people taking further education courses at AKBV. The programme will be about issues on migration and racism, making participants familiar with different cultures and the experience that there are many values and attitudes to share. The organisers hope to stimulate local initiatives to be started by the participants themselves once they return to their home community.

The idea of organising a project in Thessaloniki with 45 participants from BR(10), CL(10), GR(15) and IT(10) goes back to an exchange in chat forums where young people from all over the world, originating from Europe, came together and found a common interest for their countries of origin. The aim of this exchange is to assemble youth organisations with different backgrounds (Europe and Latin America) and to discuss the role of the state as well as of the international youth organisations in their countries. Besides those objectives the project aims to confront the Latin American participants, originating from Europe, with their European roots. Most of the participants will be long-term unemployed young people.

This project is presented by the ICYE Germany in co-operation with ICYE Colombia. ICYE, the International Christian Youth Exchange, with national branches in 26 countries offers mid- and long-term voluntary services and youth exchanges in order to promote youth mobility and intercultural understanding.

This project will give 1 German and 1 Colombian volunteer to do six months services in social projects for people in need in each other’s partner country (Wuppertal (DE) and Bogota (CO)). The hosting projects are of similar type but specify with different target groups: young girls left or badly treated by their parents, street children, disabled people and children from poor neighbourhoods. The common approach of these placements is linked to the intention to give the young volunteers a opportunity for personal development and commitment to voluntary service as well as a direct benefit for children in need and voluntary or professional staff at the local hosting projects.

This project is presented as a contact-making seminar. It is planned to establish an international platform for organising volunteer projects that would last longer than typical workcamp or short term voluntary services. The meeting shall result in a joint programme being defined by common project criteria, training requirements and specific needs for hosting projects and possibilities for financial support.

Beneficiary: YOUTH ACTION FOR PEACE

Youth Action for Peace is an international peace movement founded in 1923 for the development of peace and human solidarity with branches in several European countries. It brings together young people who have as their goals a society of justice, peace and human solidarity. The main activities of YAP are international work camps and youth exchanges, seminars and training courses, peace and development education.

On of the areas where YAP was active in the last years is Latin-America where they organised several seminars, study visits and training courses. During these activities it became clear that the interest is growing in both sides of the ocean but the lack of experience is sometimes a barrier. The presented project is consequently a seminar to explore how volunteers can support to raise the profile of local NGOs, their host organisations. The seminar will take place in Puerto Vallarta (MX) and will host participants from BE, FR, DE, UK, IT, PT, ES, CL, BO, EC, GT, MX (and probably from some other Latin-American countries).

The Federation of the International Christian Youth Exchange is a non-profit making NGO with members in more than 25 countries. It promotes short and long-term youth exchanges combined with voluntary service activities, and organises training courses to enhance youth mobility and intercultural learning. This 8-day training course, taking place in Berlin, DE invites 1 representative/each of the network throughout Europe (AT, BE, DE (2 pax), DK, ES, FI, FR, IS, IT, SE, UK) and Latin America (BO, BR, CO, CR, HN, MX), in total 18 participants. This training follows the needs expressed in previous contacts in the network, and the main aim will be to provide training and transfer of know-how on financial administration, accountability, monitoring, budgeting, reporting etc in relation to the YOUTH program. The network considers it important to invite the Latin American partners, as it is also seen as a reciprocal activity following a training course in Mexico in December 2001. Furthermore, the Latin American partners are not able to receive direct support and advise in their own countries.
