INTRODUCTION

The key aim of setting out past projects in this compendium is to inspire others to create new, future projects. By giving concrete, detailed information about previous projects it is possible to demonstrate clearly what kind of activities can be carried out in the framework of the Euro-Med YOUTH programme, although the list is by no means exhaustive. The compendium offers an opportunity to discover ideas and stimulate the imagination.

The projects presented in this Compendium were selected for funding under the Euro-Med YOUTH programme at selection rounds for budget year 2004.

Cooperation with the Mediterranean countries, initially launched in 1992, is still one of the priorities of the YOUTH programme aiming to further develop and increase the number of these activities to comprise more diverse partnerships and to improve the quality of projects. The Mediterranean partners participate in the YOUTH programme via the Euro-Med YOUTH programme.1

The objective of youth activities with countries outside the European Union is to promote a better understanding of the young people’s respective environments and to foster a sense of solidarity among them. These activities enable those involved to try out different forms of democratic participation in society. By contributing to the development of the youth sector in the partner countries, the Programme facilitates the acquisition of knowledge and techniques required for the active participation of young people into civil society.

This Compendium presents the projects selected with the Mediterranean partner countries and covers various types of activities under Actions 1, 2 and 5 of the Programme.

So what are Actions 1, 2 and 5?

Action 1 - Youth Exchanges bring together groups of young people aged between 15 and 25 from different backgrounds and from several countries, providing them with an opportunity to meet, and tackle issues under various themes. This leads to a better understanding of the diversity of culture, and to an appreciation of the value of that diversity. Group exchanges aim to combat prejudices and stereotypes, to promote active citizenship and to raise positive awareness of other cultures among the young participants and in local host communities.

Action 2 - European Voluntary Service enables a young person to become a volunteer in another country for a specific period, usually 6-12 months. This provides an informal intercultural learning experience for the young people involved, encouraging their integration into society and active participation, whilst also increasing their employability and giving them an opportunity to show solidarity with other people. Voluntary service projects support the development of local communities, foster the creation of new partnerships and promote the exchange of experience and good practice. These projects are a result of partnerships between sending organisations, host organisations and the volunteers themselves. They do not involve job-substitution and they are non-profit-making and unpaid.

Action 5 - Support Measures are designed to promote the aims of the Euro-Med YOUTH programme in a number of ways. They assist the development of the other Actions of the Programme by increasing the quantity and quality of projects submitted. Alternatively they may contribute to achieving the overall objectives of the Programme and to strengthening European youth policy or they may contribute to the development of the youth sector in the partner countries.

Action 5 activities are carried out in the fields of co-operation and partnerships, training measures and youth information. Cooperation and partnership activities help to establish permanent working relations between partners, or to promote innovation that favours new multilateral youth exchanges and voluntary service. Training activities provide youth workers or youth leaders and other support persons with the necessary skills to organise and manage transnational youth activities based on intercultural learning, or provide them with knowledge and competencies to work with young people with special needs. Youth information projects encourage greater cooperation and the development of new activities or materials to complement activities carried out in the field of non-formal education.

Find out more about all these projects in the following pages, where they are listed by Action.

This document is designed not only to give information on the accepted projects, but to be used as partner search resource as well.

The project references indicating the country first are selected at national level, and further information can be obtained from the respective National Agency (for contact details, please refer to http://europa.eu.int/comm/youth/program/natagge_en.html). for the project references starting with six digits more information can be obtained from the European Commission or from the Technical Assistance Office (for contact details, please refer to the last page of this document).

YOUTH EXCHANGES

Action 1
Beneficiary: EURO-PALESTINE YOUTH

Project Title: Europe-Palestine: Understanding and Solidarity

The goal of this exchange is to give European and Palestinian youth the opportunity to meet each other. Most of the information they receive is based on the media-coverage about Palestine. The exchange will be an occasion for youth to meet, to know, to get friends. This will be achieved by participating together in work-shops, visits, discussions, sport, casual (leisure) activities... It will also be an occasion for the Palestinians to share their testimonies in schools or youth clubs, to visit universities, to create contacts with European organizations and the European Commission, with Europe and its capital, Brussels. By this exchange, the Belgian youth will have to work to prepare it, open themselves to another culture, get responsible of other youth, to come over the "prejudices" such as: Palestinians are Muslims, their life is filled with violence... We are convinced that this project which is concerning youth of the entire Palestinian nation (including people who fled from Palestine) and European youth will reinforce the solidarity and the understanding between the two borders of the Mediterranean Sea.

Project Title: Islamophobia, prejudice or reality

The main role of the project "Islamophobia" is to discuss the topic and work against prejudices. It is clear that lots of people in the world think of terrorism when they hear about Islam. But it is really wrong to link Islam with terrorism; it is only a minority of people who commit crimes. Almost every Muslim on this world is against this terrorism, but western people don't know this. We want to bring young people closer together and talk about all these issues. Also to create a space filled with open-minded people, Muslims and non-Muslims, to encourage dialogue, respect and understanding.

This international youth exchange is a continuation of the project taking place during this summer in Glencree Center for Reconciliation, Ireland, where young people from Palestine, Israel, England, Ireland, Northerm Ireland and the Basque Country were involved. The aim of this new project is to continue with the important ideas and objectives we were talking about, to bring together youth from around the world in order to facilitate cultural, political and social dialogue. All the countries involved are currently experiencing a political conflict or are in the transition period from a political conflict. By comparing and contrasting areas of conflict throughout the world we hope to manage a further understanding of reconciliation project. Apart from having a space to talk in a free and comfortable atmosphere, we will also be meeting people involved in political parties, people coming from social movements, youth groups and we will have the opportunity of visiting the hosting party and approaching the reality of the conflict they are living.

IRELAND

**Beneficiary:** GLENCREE CENTRE FOR RECONCILIATION

**Project Title:** Societies in Conflict: Borders to Peace

The youth exchange will bring together youth in order to facilitate cultural, political and social dialogue. This project will involve 8 countries, who are currently experiencing or are in transition from political conflict. By comparing and contrasting areas of conflict throughout the world the project hopes to contribute to the further understanding of reconciliation. The theme of the exchange is border and how borders affect people in every way, looking at personal vs. public borders, physical vs. psychological borders and how and why barriers are constructed. The programme reflects the experiential and participative approach of the centre and includes discussion, debate, film and media analysis, drama, guest speakers, political debates, outdoor activities and visits to important historical and cultural sites. A trip to Northern Ireland is seen as an important element to the programme in addition to provide an opportunity for participants to get to know Irish political history. The visit to the Peace Wall and murals in Belfast will be a clear manifestation of Borders and will lead to formal and informal discussions of how borders affect people and provide a more intimate framework for exploring the conflict, particularly through interacting with local youth and prominent politicians.

This project wants to be an opportunity to meet different cultures with the aim to fight against racism and xenophobia. We have thought about music as the instrument what can help to reach this aim, because it is a kind of language that allows the communication of ideas and feelings without linguistics barriers. Consequently, music is used as the dialogue tool that gives the chance to people who do not speak the same language to share moments together.

Project Title: Med Days: Behind Culture

The "Med days: behind culture" project was born in the SALTO-Euromed Long Term Training Course - Jump Into Euromed Youth Exchanges, realized in November 2003 in Blanquefort - France. During that course, we (the partners of the project) met each other and found out that we have the same interests and ideas. We decided to write a project in order to discuss the issue of the acceptance of diversity and the active participation of young people.

Project Title: Mettiamoci in gioco

The exchange will propose discussions, workshops and manual activities alternated with games, excursions and free time. All the activities will culminate in the organization of a "play day" around the village hosting the group. This means to disseminate the activities and the work realised during the project through the Youth Programme, make people aware of the issuea dealt in the exchange and show how games, circus activities and work group can be a possible strategy to start relating people, exchanging ideas, meeting other cultures. The target group of youth involved in the exchange are young people coming from difficult context in their city or origin. For most of them the other is only the immigrant, the delinquent, someone external with whom I do not relate myself. One of the aims of the project is to teach that the other comes from another culture as rich as mine, with many common points and other different ones to learn and discover.

Project Title: MEDWEEK

The Medweek project was born in the Salto-Euromed Long Term Training Course - Jump into Euromed Youth Exchanges, realized in last November 2003 in Blanquefort - France. This project will be made by using cultural activities, music, dance, painting, outdoor games; sports and group dynamics to promote the discussion about the cultural differences. The fact that we are in a Euromed context and that Israel and Palestinian participants are together in this project gives a special flavour to this challenging aim - to put people coming from different cultures to work and learn together.

Project Title: Modernity and Tradition: A merger for a successful future for young Mediterraneans!

Youth for exchange and understanding is an international non-governmental organisation founded in Strasbourg in 1986. The European secretariat that presents this project coordinates the member branches and promotes activities to foster cooperation between young people of diverse political, social and religious background. As stated in the project title 'Modernity and Tradition', this exchange will focus thematically on these two points with the objectives to underline that traditions do not necessarily have to be rejected in a modern world. The themes will also be linked to the importance of identity -especially for people who migrate- and the problem of social integration. The themes will be addressed during workshops using a number of intercultural methods. There will also be contacts with the local culture and youth groups. Through this project the partners hope to facilitate the official recognition of the Tunisian YEU branch as a youth organisation and motivate the local young people to participate in their future activities. 24 young people will be participating (2CY, 2EG, 2DE, 2GR, 2IT, 2MT, 2PT, 2TN, 2TR, 2LB, 2IL).

**Project Title:** CARE FOR TORTURE SURVIVORS

"Care for Torture Survivors" is a project that facilitates Medical Rehabilitation Centre for Torture Victims (in short MRCT)'s activities in providing medical, psychological, social and legal services to torture survivors. Moreover, the involvement of international volunteer in our activities is a way of incorporating new insights and ideas from the volunteer's background, social dynamics, and culture he/she lives in.

MRCT believes that the presence of a volunteer from a Mediterranean country creates a climate of trust and comfort to refugees who need the services offered by the Center because it demonstrates to them a much needed international dimension to their issue. It also provides additional help to refugees to integrate into the Greek society and encourage them to be involved in social activities.

MRCT has already close cooperation with other organisations from other countries, and this experience indicates that such an involvement is useful to improve the work done with refugees.

Project Title: Service volontaire franco-allemand de soutien au développement des sociétés civiles

This project involves two associations based in Fes (MA) who are close to each other and who complement each other regarding civil society development.

ESPOD (Espace Point de Départ) was first interested in the promotion of female micro enterprises, followed by supporting children and young people by offering them leisure time activities and by assisting them through democratic related training sessions.

The 'Association Rencontre Maroc' develops community life and offers assistance to developing local cultural projects on an individual basis. It is becoming an intercultural meeting centre and cooperates with ‘Rencontre” an association based in Dunkerque (FR) on a variety of projects supporting community life and Euro-Mediterranean activities. The two sending associations "Rencontre" and "Arbeit und Leben (Düsseldorf, DE) have already organised encounters in Fez and Meknes and hosted trilateral gatherings of young people from Morocco, France and Germany.

The aim of this project proposal is for each Moroccan organisation to host 1 French and 1 German volunteer as enrichment of the franco-german voluntary service and to further develop Moroccan civil society and Euro-Mediterranean cooperation.

The Maghreb countries often have the impression that they are somewhat excluded by Europe. It is therefore important that they can learn from each other. For the volunteers it will be a unique experience whereby all partners will benefit from the experience.

Project Title: Paestum torre di mare in Italy for a Turkish boy

Legambiente is an organisation mainly based in Italy and well known for its national campaigns. But Legambiente aims to let local people to think to a wider view, considering at least the whole Europe as the place we are living. The EVS programme gives to the activities run at local level a relevant European dimension, important either for the local young people and for the local community. Legambiente stresses the importance to consider the environment a community international property, which has to be protected everywhere in world, this is why European volunteers are coming to stay also in Paestum. For the local community, Europe is still something far from Paestum, interesting only if it brings tourists and business. EVS long term projects on the contrary allow local people in get in touch deeply with young Europeans. Italian local youngsters at the same time - the area is touched by high rate of unemployment among young people - are often not encouraged in taking in account voluntary action as an important training tool for their personal growth: so, EVS volunteers become a good peer examples for looking beyond the ordinary poor daily perspectives.

Project Title: "Volunteering in Israel to develop the understanding between different cultures"

Volunteering in Israel to develop the understanding between different cultures is a long-term voluntary service project through which two young Italian volunteers will discover Israeli culture by getting to know their peers in the host community, as well as by learning the local language and customs. The host organisation is an Arab-Bedouin centre next to Isfia village in northern Israel - it promotes traditional and contemporary beduine-arab heritage and culture. Their activities target both children and adults. Workshops and other activities on the subject of Beduin heritage are offered, as well as guided tours in the museum and desert life tours in Carmel Mountain. The two volunteers will be involved in these regular activities of the centre with a specific aim to get the local young people interested in the local Beduin culture. More specifically the tasks will be composed of: helping in the library at the centre, contributing to the work in the Beduin heritage museum and for the main part, coordinating workshops with children and young people."

Youth Action for Peace International is a European level NGO with branches in several European countries. It is a platform for young people who are involved in activities which promote peace, solidarity and a just society. The international section is active in the area of exchanges, voluntary service projects and training. The activities will be coordinated by one of the local hosts. All of them have a common profile of organisation, activities and project framework for the volunteer. They are local NGOs, providing community development services with a focus on young people. This includes youth clubs and social centres. They expect their international volunteer to give an intercultural dimension to regular activities. And the volunteers are asked to share their experience with a wider public upon return. The volunteers on the other hand will get a unique opportunity to engage themselves in very practical community development in Palestine.

Action 5
DENMARK

Beneficiary: EBELTOFT UNGDOMSSKOLE

Project Title: Integration through sports - part I

Organisations from Denmark, Germany, Italy, Jordan, Palestine and Syria would like to create a 4 step project that will increase the focus on using official and alternative sports as a tool to optimise integration and to improve social exclusion among young people aged 15 - 19. During the seminar in Jordan the partners came up with the idea to create a 4 step project - Study visit (1), Training course (2), Study visit (3) and Youth Exchange (4). As Denmark is very known for its inhabitants involvement and participation in sports associations we chose to start our 4 step project by applying for a study visit in Denmark to give the involved partners a possibility - through visits to various projects and discussions with the people working in this field - to get inspiration, new tools, ideas and knowledge in order to plan the next 3 phases of the project.

Project Title: Le cycle festif comme support pour l'apprentissage interculturel

This project aims at establishing contacts, exchange of experiences and skills in organising pedagogical projects between several NGOs from Morocco, Tunisia, Spain and France with the topic of the "popular festive cycle" as a support. The idea initiated from a Future Capital project realised by a former Spanish EVS volunteer. The framework of his project is ICL as a means to fight discrimination. This is why we chose the "Fête" (=feast/festival/holiday) because it is an element present in all cultures enabling intercultural dialogue. The final aim is to build a concrete exemple in ICL and to allow for an exchange of ideas and experiences among partners.

**Beneficiary:** ROMANS INTERNATIONAL

**Project Title:** Jeunesse Echange le Monde

This project is about creating a network of cooperation and of permanent exchanges between the youth organisations and services of the French town Romans and of its eight twin towns in Europe and in the Mediterranean countries. It also aims at developing and preparing future youth exchanges within the network. This networking project intends to bring about an evolution in the twinning activities from the traditional exchanges towards the construction of projects at the initiative and for the benefit of the young people themselves. Beyond the usual bilateral and sectorial activities it has the ambition to create a network of partners around multilateral projects. The network will function thanks to common tools facilitating the contact making, the debates on professional realities, the training of partners, the recognition of skills.

**Project Title:** Going deeper: creating and reinforcing partnership in Euro-MEDa

This project is a Contact Making Seminar. Our main purpose is to create and reinforce partnership among European and Mediterranean organisations. Both us as the Mediterranean associations as well as the other European associations involved in the project, feel the necessity to share our way to work, to create new partnership and to improve the quality of our projects in Euromed YOUTH by the confrontation and the communication with the others. During the program we will use lots of active and participating methods (like working groups, role playing and exercises about intercultural learning and conflict management). After the seminar coordinating group will be established that will follow the development of the new projects and will help with suggestions and monitoring.

The aim of this contact-making seminar is to get new contacts between youth associations and improve the possibilities for better cooperation in the future. Lectures will enrich the partner's knowledge about European Voluntary Service. The participants will have time to exchange new ideas, aspects and perspectives for later projects and to make new cooperation. International games, ice-breakers and energizers will be one way to overcome prejudices between different countries and cultures. Visits to interesting places and other activities will offer an opportunity to get to know each others better and to connect peoples and associations.

Project Title: Rivages en Dialogue

The proposed job shadowing aims at creating long-term partnership between young people in Alger and Sicily. A youth worker from ARCI Sicily will go to the association ABIT in Algeria in order to get a clear picture about the work done by this organisation and to share his experience. ABIT is a local organisation aiming at the integration of young people through different cultural and social activities. Both associations want to set up activities under Euro-Med and this will be their first step of creating something together. The job shadowing will be an interesting learning experience for both the youth worker and the organisation. The work plan will include different meetings with local associations, thus giving an opportunity to the Italian youth leader to create contacts and get a picture about associatif mouvement in Algeria.
