Strategies and actions may be cross-sectoral, so this article should be read in conjunction with the ‘Introduction: Mobility and Internationalisation’ [1].

**Student mobility**

Global Wales Discover [2], which is run by British Council Wales [3] and funded by the Welsh Government [4] and Global Wales [5], provides funding for Welsh universities to deliver short-term mobility opportunities for Welsh undergraduates [6]. Students can spend between two and eight weeks studying, working or volunteering in an EU member state, the USA, Canada, Japan, the United Arab Emirates, Qatar, India, China or Vietnam.

In May 2019, the Welsh Government and Universities Wales [7], which represents the interests of Welsh universities, announced [8] new partnerships with the Fulbright and Gilman international scholarship programmes. The agreements will fund the mobility of students and researchers between Wales and the United States, with the aim of developing long-term educational links. They aim to build on existing established links between Welsh and US universities, such as through Seren [9], the network which supports Welsh secondary school students to apply for and attend some of the top universities in the world, including Harvard and Yale in the US.

Information on mobility opportunities for UK students in higher education, including the opportunities available under the European Union Erasmus+ [10] programme for education, training, youth and sport, is provided in the article on ‘Mobility in Higher Education’ [11] for England.

**Academic staff mobility**

Information on mobility opportunities for academic staff in UK higher education, including the opportunities available under the European Union Erasmus+ programme for education, training, youth and sport, is provided in the article on ‘Mobility in Higher Education’ [11] for England.

Article last reviewed November 2019.
