Project aim:

Fostering school leadership and effective networking through capacity-building (via self-assessment, training and sharing of best practices) within three key areas linked to the strategic development of the school: STEM education, innovative use of ICT in teaching, and digital citizenship.
3 key elements that make my project being a Forward-Looking Cooperation Project:

• Trans-national co-operation network aiming to test, develop and assess innovative policy approaches

• Involvement at all levels: teachers >>> regional >>> national >>> EU

• Capacity to innovate and reach a systemic impact through our activities
3 main characteristics of my partnership:

• It provides an appropriate mix of analysis, practice and policy-making in order to achieve the project’s objectives

• Partners bring to the project the secondary schools they work with

• Partners offer the competence profile needed thanks to their knowledge and competence in the area of leadership
3 main project results expected and how they contribute to improving the EU education landscape in the call priority area:

• Improvement of the quality of school education through continuous professional development and the development of self-assessment tools

• Creation of an independent network of teachers

• Innovative guideline for school leadership → To foster shared leadership in schools
